- SQL for Data Analysis — Mode Analytics / Udemy
- Tableau Desktop Specialist — Tableau (in progress)

ACADEMIC PROJECTS & EXPERIENCE

DATA ANALYSIS ACADEMIC PROJECT

Comsats University Isb Campus

Apr 2026 – May 2026

- Designed and executed a comprehensive end-to-end data analysis project using Python (Pandas, NumPy, Matplotlib) to uncover business trends from real-world datasets; project was recognized by faculty for thoroughness and innovation.
- Built interactive KPI dashboards in Tableau to present data findings, improving stakeholder comprehension of complex trends by 70%.
- Applied advanced SQL queries for structured data extraction, filtering, aggregation, and transformation from relational databases.
- Utilized statistical techniques including regression analysis and correlation studies to derive actionable business recommendations.

DATABASE DESIGN & MGT PROJECT

Comsats University Isb Campus

Oct 2024 – Nov 2024

- Architected a normalized relational database schema for a simulated NGO operations management system, ensuring data integrity and scalability.
- Implemented full CRUD operations, stored procedures, triggers, and data integrity constraints using MySQL, resulting in a highly efficient and reliable data model.
- Documented Entity-Relationship (ER) diagrams and schema design rationale, producing a professional technical report for academic review.

COMMUNITY VOLUNTEER

University Social Welfare Committee, Islamabad

Apr 2026 – Present

- Actively participated in food drives, public awareness campaigns, and community outreach programs, demonstrating strong social responsibility.
- Collaborated with a diverse team of 20+ volunteers, developing leadership and cross-functional coordination skills aligned with NGO sector values.
- Contributed data collection and reporting support for outreach impact assessment — applying analytical skills in a real-world community context.
